ABSTRACT

The New Jersey Grade 11 High School Proficiency Test (HSPT11) consists of sections for reading, mathematics, and writing that must be passed as requirements for a high school diploma. Students who do not pass all three sections receive additional instruction and retake sections they have not passed. HSPT sections were administered to 4,453 Grade 12 students in April 1995. Table 1 presents statewide results for these students, 4,275 of whom were retesting students, and 178 of whom were first-time test takers. Of the retesting students, 45.1% passed all the sections, while 53.4% of the first-time test takers passed all the sections. Of retesting students, 42.9% passed the reading test this time, 54.3% passed the mathematics test, and 42% passed the writing test. Table 1 presents statewide results for Grade 12 students, and tables 2 through 6 present results for each subject. The report also contains district-by-district and school-by-school results grouped by district factor group. District factor groups are groupings by socioeconomic status. (Contains 6 tables and a 38-page compilation of results.) (SLD)

Grade 11 High School Proficiency Test
April 1995

GRADE 12 RESULTS

The New Jersey Grade 11 High School Proficiency Test (HSPT11) consists of three sections--Reading, Mathematics, and Writing--and must be passed as one of the requirements for a high school diploma. Students who do not pass all three sections will receive additional instruction and will be retested on the section or sections they did not pass. The Total HSPT11 Reading, Mathematics, and Writing scores are reported as scale scores with a range of 100 to 500. The passing score is 300.

One or more sections of the HSPT11 was administered between April 4 and 6, 1995 to 4,453 Grade 12 students. This figure excludes those students classified as special education or limited English proficient.

This report includes a series of tables summarizing test results for the State, Special Needs Districts, All Other (not special needs) Districts, and District Factor Groups (DFGs).

Table 1 presents statewide results for Grade 12 students who took the April 1995 test. Of the 4,453 Grade 12 students who took the April 1995 test, 4,275 were Grade 12 retesting students and 178 were Grade 12 first-time testing students. Of the 4,275 Grade 12 students who were retested with HSPT11, 45.1% students passed all the sections attempted (whether one, two, or three). Of the 178 Grade 12 first-time testing students, 53.4% passed all the sections.

Results for each subject--Reading, Mathematics, and Writing--are included in Tables 2 through 6. Finally, the report contains district-by-district and school-by-school results grouped by DFG. An explanation of the District Factor Groups is included at the end of this report.

The HSPT11 scores in this report exclude special education students, limited English proficient students, and students whose answer folders were voided.

The data in this report are based on information collected from students' answer folders. Subsequent to the distribution of test results in June 1995, there was a procedure for amending student identification information to correct errors that were made when students' answer folders were completed. Corrections to student identification information that were received by the State Department of Education by June 30, 1995 have been included in these summaries.

Highlights from the April 1995 Grade 12 Tables

Special Needs

Of the 2,386 Grade 12 students in the Special Needs Districts who took the April 1995 test, 2,333 were Grade 12 retesting students and 53 were Grade 12 first-time testing students. 39.3% of the retesting students passed all the sections attempted (whether one, two, or three). 30.2% of the first-time students passed all three sections.

All Other

Of the 2,067 Grade 12 students in the All Other (not special needs) Districts who took the April 1995 test, 1,942 were Grade 12 retesting students and 125 were Grade 12 first-time testing students. 52.2% of the retesting students passed all the sections attempted (whether one, two, or three). 63.2% of the first-time students passed all three sections.

District Factor

The percent of Grade 12 retesting students who passed all the sections attempted ranged from 38.4% of 2,213 students in DFG A to 59.3% of 135 students in DFG I. The percent of Grade 12 first-time testing students who passed all three sections ranged from 29.4% of 51 students in DFG A to 81.8% of 22 students in DFG I. (Because ten or fewer students in DFG J were retesting and first-time testing Grade 12 students in April 1995, these numbers are not reported.)

Reading

Of the 2,689 Grade 12 students who took the Reading section, 2,532 were retesting students and 157 were first-time testing students. Of the 2,532 retesting students, 1,087 students or 42.9% passed Reading. Of the 157 first-time testing students, 122 students or 77.7% passed Reading.

Mathematics

Of the 2,683 Grade 12 students who took the Mathematics section, 2,527 were retesting students and 156 were first-time testing students. Of the 2,527 retesting students, 1,373 students or 54.3% passed Mathematics. Of the 156 first-time testing students, 134 students or 85.9% passed Mathematics.

Writing

Of the 1,500 Grade 12 students who took the Writing section, 1,358 were retesting students and 142 were first-time testing students. Of the 1,358 retesting students, 570 students or 42.0% passed Writing. Of the 142 first-time testing students, 114 students or 80.3% passed Writing.

DISTRICT FACTOR GROUPS

The District Factor Group (DFG) is an indicator of the socioeconomic status of citizens in each district and has been useful for the comparative reporting of test results from New Jersey's statewide testing programs. The measure was first developed in 1974 using demographic variables from the 1970 United States Census. A revision was made in 1984 to take into account new data from the 1980 United States Census. The DFG designations were updated again in 1992 using the following demographic variables from the 1990 United States Census.

A. Percent of adult residents who failed to complete high school

B. Percent of adult residents who attended college

C. Occupational status of adult household members:

1 = laborers
2 = service workers (except private and protective)
3 = farm workers
4 = operatives and kindred workers
5 = protective service workers
6 = sales workers
7 = clerical and kindred workers
8 = craftsmen, foreman, and kindred workers
9 = quasi-professionals
10 = managers, officials, and proprietors
11 = old and new professionals

D. Population Density:

persons per square mile

E. Income:

median family income

F. Unemployment:

percent of those in the work force who received some unemployment compensation

G. Poverty:

percent of residents below the poverty level

The variables described above were combined using a statistical technique called principal components analysis, which resulted in a single measure of socioeconomic status for each district. Districts were then ranked according to their score on this measure and divided into eight groups based on the score interval in which their scores were located. Eight DFGs have been created based on the 1990 United States Census data. They range from A (lowest

socioeconomic districts) to J (highest socioeconomic districts) and are labeled as follows: A, B, CD, DE, FG, GH, I, J. Updating the DFGs has not changed any district's designation as Special Needs or not Special Needs.

Whereas the DFGs based on the 1980 United States Census resulted in 10 groups containing approximately equal numbers of districts, the DFGs based on the 1990 United States Census resulted in eight groups of different sizes depending on their score. The number of districts* in each DFG is now as follows:

DFG	Number of Districts
A	35
B	78
CD	75
DE	100
FG	87
GH	78
I	105
J	15

* Includes all New Jersey's public school districts (regardless of school configuration or grade levels served).
